0.0.1 1. Intensity Transformation Implementation

```
[2]: import cv2
import numpy as np
import matplotlib.pyplot as plt

# Verify library versions
print(f"OpenCV Version: {cv2.__version__}")
print(f"NumPy Version: {np.__version__}")

# Generate a 256x256 grayscale gradient to test rendering
gradient = np.tile(np.linspace(0, 255, 256, dtype=np.uint8), (256, 1))

# Render the test image
plt.figure(figsize=(5, 3))
plt.imshow(gradient, cmap='gray')
plt.title("Library Verification Successful")
plt.axis('off')
plt.show()
```

OpenCV Version: 4.11.0

NumPy Version: 2.1.1

Library Verification Successful
